

QuickMap September 09 Upgrade

To install the **September 09** update, **V7.2.139**, insert the disk into your CD-ROM and run **Setup.exe**.

Current and Historic Property Listings available in QuickMap® SalesView (with V7.3 due end of Sept 09)

House Finder is free to QuickMap® SalesView subscribers and provides current and historic data on properties advertised for sale. This data links seamlessly into QuickMap's property boundaries, valuation, ownership information and aerial photography to give you the most comprehensive and integrated property information source on the market. House Finder gives you listings in excess of 300,000 properties (over double the nearest competitor).

- Provide accurate appraisals which include properties that are currently being advertised. **We think being able to actually see inside the house is a huge help** when evaluating properties.
- Compare listings from multiple sources. We have the most comprehensive link between LINZ parcel, title/owner, REINZ historic sales data, Quotable Value and Local Authority historic sales data in New Zealand.

For more information, see www.quickmap.co.nz/version73.htm

Also available in Version 7.3

- Updated Schools data and the ability to include schools in the QuickMap®SalesView Market Appraisal
- NZTM grid layer.
- See www.quickmap.co.nz/version73.htm for other enhancements
